

I am a XM radio subscriber and I commute approximately 40 miles to work everyday. I often rely on the instant traffic and weather reports that XM radio provides and that I pay for by monthly subscription. I don't think NAB should be trying to dictate to me what I can and cannot listen to. By the time I listen to all the commercials on commercial radio, the traffic information may be so old that it is too late to change my route to avoid a traffic jam. Please reject NAB's petition 04-160.
